

AR15 Set Up

Price Estimates are subject to change based on the dealers in your area, the quality of the parts, and the parts and accessories you choose to purchase.

PARTS OUTLINE

- Manufacture Companies
 - CMMG
 - BCM
 - AERO
 - YHM
 - ANDERSON
 - STAG ARMS
 - DPMS
 - LMT
 - LARUE
 - NOVESKE
 - RAINIER ARMS
 - RADIAN
 - DANIEL DEFENSE
 - BALISTIC ADVANTAGE
 - MIDWEST INDUSTRIES
 - AMERICAN DEFENSE MANUFACTURING

- Upper and Lower Receivers
 - Upper and Lower Parts Kit
 - Forward Assist
 - Dust Cover
 - Lower Parts Kit

- Bolt Carrier Group
 - CMMG
 - BCM
 - AERO
 - Ballistic Advantage
 - Noveske
 - Daniel Defense
 - Radian

- Barrel 10.5 – 16” Cold Hammer Forged Chrome Lined or Stainless Barrel Government or Heavy Profile with a 1:7 Twist to stabilize heavier grain bullets
 - CMMG
 - BCM
 - Ballistic Advantage
 - Daniel Defense
 - Noveske
- Trigger
 - Mil Spec
 - Rock River National Match
 - Larue
 - Giesele
 - Timney
 - Schilen
- Pistol Grip
 - Magpul Miad
- Magpul Bad Lever
- Stocks
 - SBA3
 - Magpul
 - Mission First Tactical
 - ERGO
- Buffer, Spring, Buffer Tube
 - Receiver Plate and Castle Nut
 - Mil Spec H, or H2 Buffer
 - JP Enterprise Captured Spring Buffer
- Iron Sights
 - Magpul MBUS PRO Low Profile Iron Sights (Adjustable Range Rear Sight)
 - A.R.M.S.
- M-Lok, Key Mod, or Picatiny Rail 9 – 13”
 - Midwest Industries
 - American Defense Manufacturing
 - Daniel Defense
 - BCM
- Muzzle
 - Compensator
 - Flash Hider
 - Muzzle Break
- Accu-Wedge

OPTICS

- Aimpoint
 - T1 or T2 Micro

- Comp M2, M4, M5
- Trijicon
 - Any Optic
- Vortex
 - Strike Eagle
 - Viper Gen I or II 1-6 /1-8 Power
 - Razor HD
 - Red Dot / Reflex Sights
 - Razor
 - Viper
 - Venom
 - SPARC AR
 - SPARC II
 - STRIKE FIRE II
- Leupold
 - Mk4
 - Mk6
 - Mk8
 - LCO
 - Delta Point

OTHER OPTIC COMPANIES

- Night Force
- Schmidt Bender
- US OPTICS
- Burris
- Bushnell
- Holosun

OPTIC MOUNT

- A.R.M.S. Mounts
- Larue
- Vortex

ADDITIONAL ACCESSORIES

- LFT Brokos Brace
- BCM & Magpul Vertical Grips
- Light
 - Ariska Malkoff Light
 - Surefire M300 Scout Light w/ Midway MLOK Mount
- Steiner DBAL A3 or I2 Laser
- Mech Force G10 Rail Panels

AR15 RECOMMENDED BUILD GUIDE LISTS

TRUCK/URBAN AR PISTOL

- Mil Spec Upper and Lower and Parts
- SBA3 Pistol Brace
- Magpul Miad Pistol Grip
- Magpul Bad Lever
- Mil Spec H/H2 Buffer or JP Captured Spring Buffer
- Trigger
- Bolt Carrier Group
- 10 - 13.5" Barrel
- 9.5 - 12.5" MLOK Rail
- Muzzle Brake, Flash Hidder, or Compensator
- Mech Force G10 Rail Panels
- Vertical Grip or Angle Grip
- Magpul MBUS Pro Iron Sights w/ Non Adjustable Rear Sight
- Red Dot Optic
- Light Ariska or Surefire Scout
- Laser (Only if you intend on purchasing Night Vision)

Rough Estimate: \$1500.00 – 4000.00 +

We recommend the AR Pistol because when it comes down to the AR Pistol's ability to be portable, concealable, and to throw lead down range while maintaining a compact profile it's hard to beat. Especially when compared to sub machine guns or just having a pistol. The AR Pistol is great for urban environments because it will allow for greater maneuverability and is not as likely to snag when maneuvering over obstacles. You'll maintain decent range capability with the platform, and still have plenty of stopping power. Along with all that it's easy to throw in your back seat with a FLC and leave there for when a bad day comes knocking on your door.

AR15 RECOMMENDED BUILD GUIDE LISTS

MULTI-ROLE RIFLE

- Mil Spec Upper and Lower and Parts
- SBA3 Pistol Brace or Magpul Stock
- Magpul Miad Pistol Grip
- Magpul Bad Lever
- Mil Spec or JP Buffer
- Trigger
- Bolt Carrier Group
- 14.5 – 16” Barrel
- 12 – 13” MLOK Rail
- Muzzle Brake, Flash Hidder, or Compensator
- Mech Force G10 Rail Panels
- Vertical or Angle Grip
- Magpul MBUS Pro Iron Sights w/ Adjustable Rear Sight
- Bubble Level
- Larue M4 / SPR Mount
- Variable Scope
 - Leupold MK6 1-6
 - Vortex Viper PST 1-6
 - Throw Lever
- Red Dot Reflex Sight with Larue Mount
- Light Ariska or Surefire Scout
- Laser (Only if you intend on purchasing Night Vision)

Rough Estimate: 2500.00 – 6000.00 +

Of all the builds we have for the AR15 we recommend the Multi-role AR15 above the rest for these reasons. The multi-role platform is going to give you the most diversity, capability, and performance due to its barrel length which will increase muzzle velocity, range, and accuracy, a variable scope with a good reticle will allow you to take more accurate shots at longer ranges and maintain separation between you and a threat, the red dot reflex sight will allow you to make faster transitions between close shots and distance shots in a high stress situation, and all for faster target acquisition when doing CQB that way you don't have to constantly be adjusting you variable scope while in an urban environment. The name of the game with this rifle is being able to kill as many birds with one stone as possible. The initial investment maybe higher but the longer-term gratification and ability to direct your money into training and building the most skills on that platform will out weight having multiple guns. This is why we highly recommend you build the multi role platform first or modify what rifles you have to increase your chances of survivability and give you the most out of your rifle.
