** This set up is just one of many ways you can set up a plate carrier. Take the time to really consider what your mission is and what you want to be able to do, and what you’ll need to be able to do when setting up your plate carrier. Don’t rush this process. We set this plate carrier up to be multi-functional and capable of doing work in urban and semi-rural environments.

** At this time ballistic plates are not incorporated into the set up of the plate carrier. When you purchase plates make sure you are buying plates that will properly fit into the plate carrier. We will be adding plates to this set up when we complete our ballistic plate video and supporting document.

** Until we complete the ballistic plates video and supporting document, we only recommend the Safariland Protech Plates to be purchased for your plate carrier.

PRICES MAY VARY FROM SITE TO SITE AND WHETHER THE EQUIPMENT IS NEW OR USED.

If there are any items that you feel would be beneficial to add to this video and list please feel free to contact us at any time and we will take your recommendation in to consideration.
